PROFILE

Senior project and program manager with seven years owning multi-client delivery, remote teams, and the people who make it work. Primary point of contact for enterprise clients — managing expectations, scope and trust end-to-end — while coaching the wider delivery team. A decade across customer experience, enterprise operations and digital delivery, all pointed at making sure what gets built actually solves the problem.

EXPERIENCE

Program Manager

2018 — Present

Senior PM · Athlon, Digital Agency

Primary point of contact for multiple enterprise clients simultaneously — owning relationships, expectations and trust without escalation.

Led biweekly and monthly delivery calls: agendas, retrospectives and scope across complex engagements.

Built and ran a monthly skills-development programme for producers, PMs and QA, from scratch.

Owned the full delivery lifecycle — discovery, scoping, sprint management, client communication and close-out.

Project Manager

2017 — 2018

HP Affiliate Company

Established a structured PM practice within a large corporate environment.

Hands-on with oversight, governance and accountability at enterprise scale.

Subject Matter Expert

2013 — 2017

Operations · IBM

Advanced to SME within a large global operation.

Built deep understanding of how enterprise-scale processes are structured, maintained and improved.

Mentored junior colleagues and contributed to quality standards and documentation.

Customer Support Agent

2011 — 2013

US Hosting Company · Where it started

Learned customer-first communication: listening properly and understanding what people actually need.

Developed product fluency across hosting services — upselling through relevance, not pressure.
